

Nithin Kumar Jada

Java Full Stack Developer | nithinjada18@gmail.com | (806) 726-0915

SUMMARY

Java Full Stack Developer around 2 years of experience in building scalable enterprise applications and cloud-native solutions using Java 17, Spring Boot, Angular, and AWS. Skilled in developing RESTful APIs, microservices, and implementing CI/CD pipelines with Jenkins, Docker, and Kubernetes. Experienced in real-time data processing with Kafka, asynchronous messaging via JMS/RabbitMQ, and managing databases like MySQL, MongoDB, and Oracle. Adept at Agile, TDD, and cross-functional collaboration to deliver high-performance, secure, and user-focused solutions. Hands-on experience with frontend technologies such as Angular and ReactJS, combined with a deep understanding of backend development and database systems including MySQL, Oracle, and MongoDB. Skilled in CI/CD pipelines using Jenkins, Docker, and Kubernetes, as well as real-time data processing with Kafka, and asynchronous messaging using JMS and RabbitMQ.

SKILLS

- **Programming Languages:** Java (Java 8–17), JavaScript, TypeScript, SQL, Python
- **Frontend Technologies:** Angular (up to v14), ReactJS, Redux, HTML5, CSS3, JSP, Bootstrap, AJAX, jQuery
- **Backend & Frameworks:** Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, RESTful APIs, Express.js, Microservices Architecture, JDBC, Multithreading, Backend Development Maintenance
- **Web Services:** REST (JAX-RS, Jersey), SOAP (JAX-WS), Postman, SoapUI, JSON
- **Messaging & Streaming:** Apache Kafka, RabbitMQ, JMS (Java Message Service), Apache Camel
- **Cloud & DevOps:** AWS EC2, S3, Lambda, Glue, VPC, CloudFormation, CloudWatch, Docker, Kubernetes, Jenkins, Maven, Git, CI/CD Pipelines
- **Databases:** MongoDB, MySQL, Oracle, Couchbase, PL/SQL (basic)
- **Testing & Automation:** JUnit, Mockito, Selenium WebDriver, Jest, React Testing Library, ReadyAPI, Test-Driven Development (TDD)
- **Tools & Practices:** Agile (Scrum), JIRA, Log4j2, Design Patterns (DTO, DAO, Singleton, Factory), Pair Programming, Stakeholder Collaboration, Technical Troubleshooting Support, Mentoring / Knowledge Sharing
- **Other:** Node.js

EDUCATION

MS Computer Science, Texas Tech University

Lubbock, TX

EXPERIENCE

Texas Tech University | Java Full Stack Developer

Aug 2024 – May 2026

- Developed and optimized RESTful APIs using Spring Boot and Hibernate, improving data retrieval speed by 25%.
- Actively engaged in Agile ceremonies such as sprint planning, daily stand-ups, and reviews, ensuring 95% on-time delivery of assigned tasks.
- Led Agile development initiatives using JavaScript and Java, achieving a 30% reduction in cycle time through Scrum practices and microservices implementation.
- Promoted team collaboration through code reviews, performance optimization, and mentoring junior developers; designed and enhanced dynamic front-end components using JSP and JavaScript, improving user experience by 20%.
- Implemented CI pipelines using Jenkins and managed builds with Maven, cutting deployment times by 30%.
- Automated repetitive tasks, boosting developer productivity and reducing manual errors in the SDLC.
- Resolved 90% of production issues within SLA through real-time debugging and troubleshooting; maintained high-quality code through unit and mock testing with JUnit and Mockito, achieving 85% test coverage.
- Built and managed CI/CD pipelines using Git, Jenkins, and Docker, streamlining deployments, automated testing, and release cycles.
- Utilized Eclipse IDE for coding and debugging, deployed web applications on Apache Tomcat, and collaborated with QA during UAT, reducing post-release bugs by 25%.

PROJECTS

Cloud-Native Digital Banking Ecosystem

- Developed scalable microservices using Java 17, Spring Boot, Hibernate, and Kafka while implementing RESTful APIs and secure authentication with Spring Security.
- Automated CI/CD pipelines using Jenkins, Docker, Kubernetes, Maven, and AWS services including EC2, S3, Lambda, and CloudWatch for cloud-native deployments.

Distributed Enterprise Claims Processing Platform

- Designed and developed enterprise web applications using Java, Spring Boot, ReactJS, JSP, Hibernate, MongoDB, and MySQL with responsive UI components and RESTful services.
- Implemented asynchronous messaging using RabbitMQ and JMS, performed testing with JUnit and Mockito, and managed deployments through Git, Maven, Jenkins, and Docker.
